ZENSA TOPICAL ANAESTHETIC

The purest 5% Lidocaine Cream. Zensa numbs your skin so you can stay relaxed throughout painful procedures like tattoos, tattoo removal, permanent makeup, eyebrow microblading, electrolysis, and waxing.

FDA, Health Canada, and artist approved, Zensa is the most natural numbing cream on the market. It contains health conscious ingredients that provide anti-inflammatory properties, which calm itching, burning, and stinging while helping your skin heal faster.

Cream works quickly and lasts longer (30-45 min absorption and lasts for over 3 hrs).

Does not constrict blood flow having no effect on the tattooing process or end result.

5% Lidocaine | Vitamin E | Doesn't Constrict Blood Flow | All Natural | Anti-inflammatory Properties | Most Natural Numbing Cream | Cruelty Free | Proudly Canadian.

Key Ingredients:

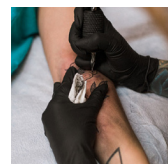

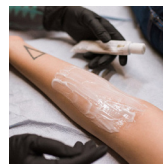

Lidocaine 5% w/w, Benzyl Alcohol, Carbopol, Lecithin, Propylene Glycol, Vitamin E Acetate, Purified Water

Zensa:

Available in:
1+, 6+, 9+, 12+

Application Procedure:

1. Clean + Apply: clean the area with an alcohol swab - super important for maximum absorption. Apply a THICK layer of cream onto the skin evenly
2. Seal: Cover the area with an airtight dressing. Use Tegaderm or saran wrap. Leave it for 30-40 minutes.
3. Wipe: After 30-40 minutes (15-20 minutes is enough for microblading), remove the dressing and wipe away excess cream. Time to get your tattoo pain free!
