SOIE-C SKIN ENHANCING SERUM

VITAMIN C

Get young, clear, fresh and glowing skin with Soie-C Vitamin C. A natural anti-oxidant, which is highly beneficial to the skin as it protects the skin from harmful environmental surroundings such as the sun, dust and pollution. It helps to clear blemishes and black spots while brightening the skin and reducing hyperpigmentation and helps to de-crease wrinkles by increasing natural collagen synthesis in the skin.

The serum has been perfected by a group of pharmacists and chemists and created the mirrored bottle to avoid the light penetration that oxidizes the product. Its stability is achieved from the addition of Ferulic Acid and Phloretin.

The Vitamin E and Hyaluronic acid helps to enhance the skin's texture.

Results in 2 weeks of use | Skin Brightening | Reduces Hyperpigmentation | Ferulic Acid | Phloretin | Vitamin E | Hyaluronic Acid | Decrease Wrinkles | Increases Collagen Synthesis | Enhances effectiveness of peels.

Application Procedure:

Apply a few drops twice daily to face, neck and décolleté, avoiding the eyes.
