ALERA

ZENSA HEALING CREAM

RESTORE- REFRESH-PROTECT. For healing and protection of the skin following laser hair removal procedures or tattooing. The citrus-based formulation absorbs quickly to disinfect, repair and rejuvenate the skin. With Grapefruit Extract and Calendula to reduce pain, promote healing and minimize scarring

Tattooing After Care | Healing properties | Disinfect | Reduces Pain | Minimizes Scarring.

Lightweight consistency of the cream is easy to apply to sensitive skin that has recently undergone laser hair removal or received a new tattoo.

Effective formulation enhances color and reinvigorates color in existing ink and does not affect your ink settling at all. Swiftly absorbed, non-oily formulation leaves skin feeling moisturized and protected.

Bracing citrus top notes revive and refresh the senses.

As a Registered Natural Health Product, Zensa Healing Cream has been certified as a safe, effective and quality product that has been manufactured to meet the high standards of Health Canada. Not tested on animals.

Key Ingredients:

Calendula, Grapefruit Essential Oil, Sunflower Oil, Avocado Oil, Hyaluronic Acid, Shea Butter, Aloe Leaf Extract, Green Tea Extract.

ZENSA HEALING CREAM

Available:
1+, 6+, 12+.

RECOMMENDED USE

- Treat and protect skin following laser hair removal procedures, skin treatments, tattooing or exposure to sun
- Promotes the healing of wounds, burns, eczema, acne, varicose veins and other inflammatory skin conditions
- Can be used as part of a daily skin care routine to provide hydration and protection from premature aging and thinning
